

BIO – W. Oscar Fleming, DrPH (candidate), MSPH

October 2018

Oscar Fleming is an Implementation Scientist based at the National Implementation Research Network at the University of North Carolina at Chapel Hill. Mr. Fleming leads the Evidence-based Decision-Making Core for the National MCH Workforce Development Center, supporting public health professional and diverse coalitions to learn and actively apply implementation science to promote the health of children, families and communities. With the National Center for Early Childhood Development Teaching and Learning, Mr. Fleming works closely with Head Start professionals to enhance implementation capacity in service to improved programs and positive outcomes for children, families and communities. Mr. Fleming has previously worked on public health, early childhood and community development programs in North Carolina, across the US and in lower and middle-income countries around the world. His areas of interest include program design, implementation science, applied research, coaching, and team development in support of evidence based and other innovative programs. Mr. Fleming is a Clinical Assistant Professor with the Department of Maternal and Child Health and an Adjunct Assistant Professor in Public Health Leadership Program, both at the Gillings School of Global Public Health. Currently working to complete a Doctorate in Health Leadership, Mr. Fleming has a Master of Science of Public Health and Bachelor of Arts in International Studies degrees from the University of North Carolina at Chapel Hill.
